

Foot Guard

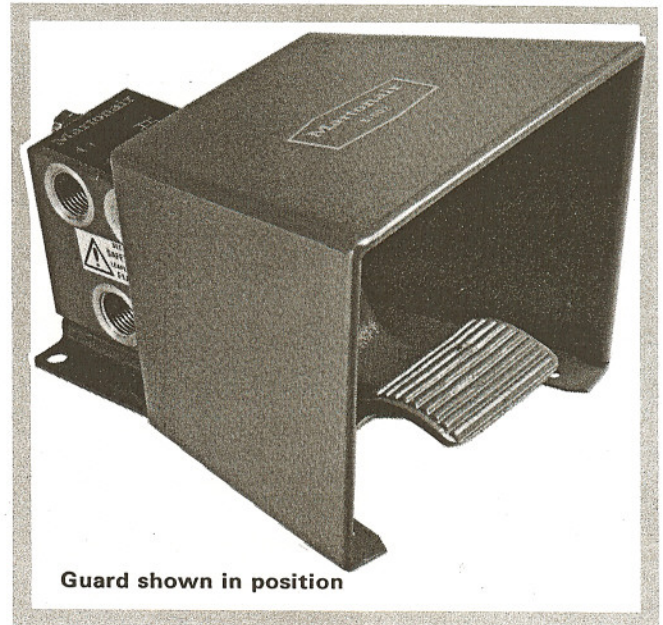

S/502

It is strongly recommended that an S/502 Footguard is utilized when using /9 and /109 Martonair valves.

The guard has been specifically designed for use with most foot operated installations.

The S/502 Footguard greatly reduces any risk of accidental operation. A removable panel has been incorporated into the guard which can be taken off when it is used in conjunction with 1/2" BSP valves.

A table of /9 and /109 valves can be seen with relevant catalogue page references.

Guard shown in position

Type	Port size B.S.P.	No. of Parts	Cross Reference
S/560/109	1/8"	3	B46 page 12
S/556/109	1/8"	5	B5 page 15
S/441/9	1/4"	3	B48 page 4
S/442/9*	1/2"	3	B50 page 3

*Panel to be removed from guard when used with these valves
